

Going Digital: Beyond Handouts

The Situation

Waste management is increasingly complex

People want to help the environment

- 63% of American adults take some sort of action when learning about the environmental issues facing the world today.
 - National Environmental Education Foundation

People care about waste

- 90% of Americans believe recycling is important and people should do what they can to try and recycle
- 91% believe if more people recycled, it would help the environment
- 82% report that most or some homes in neighborhood set out their recycling for pickup
 - Carton Council of North America

Many ways to communicate with residents

Mobile devices are on the rise

- 64% of American adults have a smartphone.
- 2015: more people used their mobile device to do a Google search than they did using a computer.

Approaches to mobile technology

Municipalities are looking to mobile devices as a means of connecting with their residents.

Approach to mobile

1. Responsive website
2. Mobile app

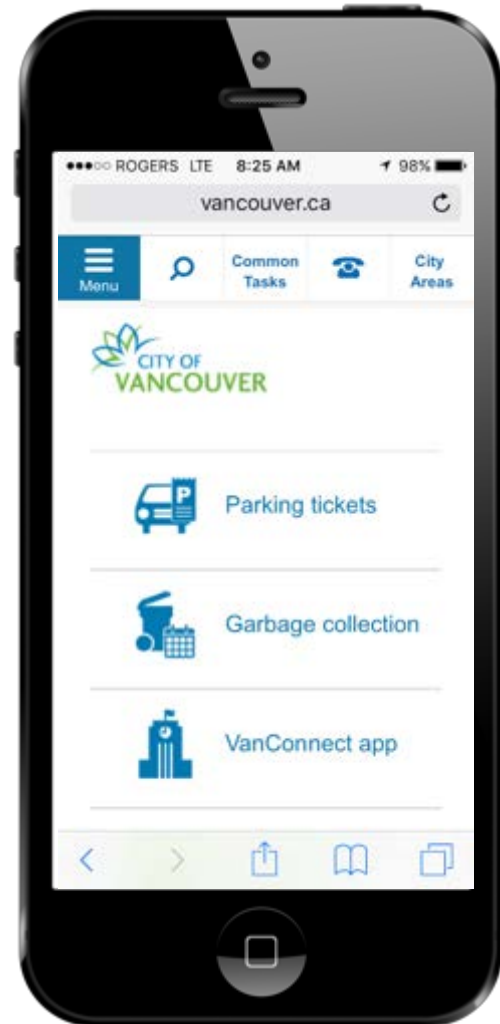

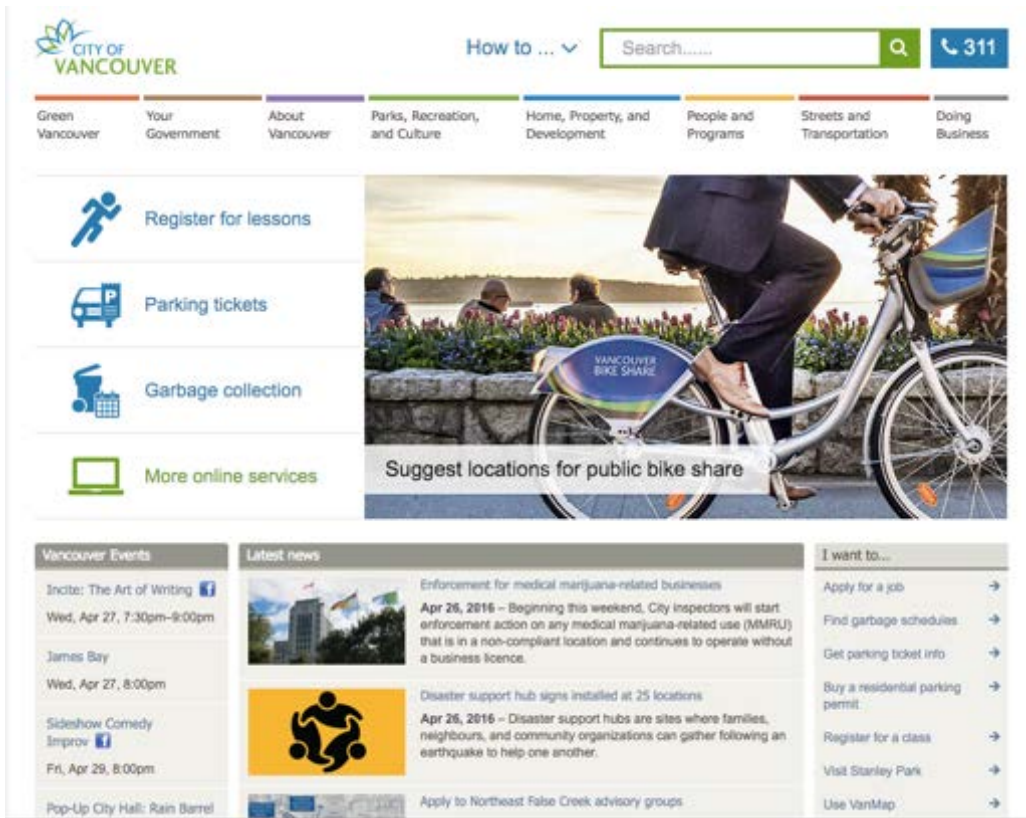

First: Responsive Website

- Website layout automatically adjusts itself depending upon the width of the device's web browser.
- A web browser on a desktop computer will display a more horizontal website, while the web browser on a smartphone will present the website in more of a vertical or “stacked” manner.

Non-responsive

Responsive

Second: Mobile App

- A mobile app is a software application specifically designed to operate on a mobile device.
- Most smartphones or tablets come preloaded with mobile apps (such as email, calendar and contacts), while other mobile apps must be downloaded from stores like Apple's App Store or Google Play.

Mobile App Growth

- 2009: approximately 2.52 billion mobile apps downloaded worldwide.
- 2015: 179.62 billion mobile apps downloaded worldwide.
- 89% of consumer media time is with mobile apps, while 11% of media time is with mobile web browsers.

How do municipalities develop a mobile presence that best serves its residents?

Using your website to
influence the development of
your mobile app

Websites have a lot of content

- Across multiple sectors, the average homepage has 108 links.
- The government sector averages 126 links on their homepages.

Websites have lots of applications

- Municipal websites utilize a number of different software applications to provide services to residents:
 - property tax estimators
 - waste collection schedules
 - parks and recreation registrations
 - utilities bill payments
 - construction permitting
 - pet licensing
 - 311 or report a problem features

Screen size

- Average desktop computer monitor is 20.9” and the average laptop monitor is 12.2”.
- On a computer, homepage web links and software applications can be easily used because the computer screen provides a lot of visual “real estate.”

In use

- Visiting a website on a computer tends to be a “stationary” activity.
- The user is most often seated, and tends to be using a keyboard, mouse or touchpad to navigate.
- Someone using a computer to visit a website tends to have more time to search and take action, such as filling in form

Using the mobile app user experience to influence the development of your mobile app

Screen size

- The average smartphone screen is 5” in size.
- With less visual “real estate,” it becomes more challenging for a resident to access all the services and programs you may hope to include in a mobile app.

In use

- People use their mobile devices on the go:
 - at home
 - in transit
 - at work
 - while shopping
- They are using their thumbs to type and their fingers to navigate.

In use

- On a mobile device, people are looking for instant information, with minimal amounts of reading.
- Many mobile devices can only legibly display 80 to 90 words before the user needs to scroll the page.

“One-city”
versus
“Constellation”
mobile apps

One-City Mobile App

- A one-city app often attempts to replicate the municipality's existing website, placing all information about the municipality's departments, services and programs into one app.

Constellation Mobile App

- A constellation series of apps separates the municipality's departments, services or programs into a number of different, but interconnected, apps.

“One-city” mobile app

The thought is...

- “Just like our website, we’ll have all programs and services in one mobile app. It’ll be easy and convenient for residents.”

The challenge

- How can a municipality possibly effectively integrate hundreds of services and programs — not to mention countless software applications — into one mobile app?

The reality

- The one-city mobile app is not about providing an accessible, user-friendly solution for residents, but instead about meeting the perceived needs of municipal staff.
- A one-city mobile app is about making procurement easier because the contractual relationship is with just one vendor.

Example

- If one municipal department is happy with how they are represented in the one-city app, but another five departments are unhappy, what's the course of action?
- Do the unhappy departments have to “live with it?”
- Would the municipality be willing or able to end its agreement with the one-city app vendor with minimal disruptions to residents?

“Constellation” mobile app

The thought is...

“Putting a ton of functionality into a single app is not the right way to do it on mobile. Having a constellation of mobile apps that all work tightly with each other seems to be the better way. And the leading mobile app companies are all headed in that direction now.”

- Fred Wilson, Investor

The reality

- While these constellation apps work independently of each other, they seamlessly move the user from one app to the other for the best mobile user experience.

Example

- With constellation apps, municipalities have more leverage over their mobile app vendors than with a one-city mobile app.
- If one of your constellation apps isn't performing the way you anticipate, you can switch vendors with residents encountering little to no disruptions.

“Constellation” mobile app best practices

Popular services

- Look at your municipality's most popular services and programs for insight into the the apps your residents may want in a constellation series of apps
- You may want separate mobile apps for
 - waste and recycling
 - parking
 - public transit
 - library
 - 311 or report a problem.

Apps that “hand-off”

- All constellation apps should include some sort of report a problem functionality.
- Ideally, one app will seamlessly “hand-off” to another app in its constellation.

Branding

- Constellation apps should incorporate similar branding to make it simple for residents to identify the municipality.
- Using clear graphic identifiers provides a simple means of wayfinding for residents.
- Use similar naming conventions such as “Pleasantville Waste,” “Pleasantville Parks,” “Pleasantville Library,” “Pleasantville 311.”

A local experience

Iris Waste Diversion Specialists, Inc.

- ▶ Resource Recovery Program Management Company
- ▶ Waste is a resource and we design, implement, manage and market waste diversion programs for government entities, businesses and institutions
- ▶ Contract with RRRASOC to provide public outreach and education
- ▶ Perform duties of Recycling Coordinator

Resource Recovery & Recycling Authority of Southwest Oakland County (RRRASOC)

- ▶ Intergovernmental, municipal solid waste authority
- ▶ Provides cost-effective, environmentally responsible, and convenient waste and recycling programs
 - ▶ curbside pick-up collection
 - ▶ recycling drop-off sites
 - ▶ HHW events

- ▶ 9 member communities
- ▶ 76,000 single family households
- ▶ Total Population -- 264,000
- ▶ RRRASOC/ReCommunity P3 to operate single stream MRF

Why Waste Wizard and Mobile App?

- Utilize a new communication method
- Ability for residents to help themselves
- Access to information
- Specific, manageable content
- Monitoring and reporting of usage

 / Clothing

Clothing and Textile Recycling

 Residents in **Farmington, Milford Township, South Lyon, Village of Milford, Walled Lake** and **Wixom** can recycle unwanted clothing, shoes, accessories and other household discards such as kitchenware, tools, toys and books, with a free, residential curbside pickup service on the same day as the weekly, recycling pick-up service.

Step 1: Place clothing, shoes and small household items that you no longer need in the Simple Recycling bag provided or other waterproof bag with a tag or large label reading: "SIMPLE RECYCLING."

Step 2: Leave the bag(s) curbside on the same day you would leave your other recyclable materials out for collection.

Step 3: Simple Recycling will collect the bags and recycle their contents for reuse!

Questions? Please call Simple Recycling at (866) 835-5068

Reuse

 Many items don't need to be thrown away - they can be reused!

Donate items to reuse centers, charity organization or thrift shops. Visit <http://rrrasoc.org/recycling/reuse-repurpose/> for a list of local organizations.

Always call ahead to ensure the item can be donated.

Recycling

RECYCLING

By recycling, you help create new products out of old ones and divert material away from landfill disposal.

- RRRASOC works with its member communities and their contracted haulers to provide residential recycling collection and processing.

Read our 2016 Curbside Recycling Guidelines >

Read our 2016 Drop-Off Recycling Guidelines >

SET-OUT REQUIREMENTS

Weekly on your designated collection day. Set out your recycling bin or cart by 7:00 a.m.

< Back

Organics

ORGANICS

In 1995, Michigan banned yard waste from entering landfills.

- Yard waste, defined by State law, is grass clippings, yard vegetation, sod without dirt, twigs (less than 2 inches in diameter), leaves, etc.
- All yard waste must go either into a brown paper yard waste bag or a trash can labeled with a "yard waste" sticker.

SET-OUT REQUIREMENTS

Weekly on your designated collection day, spring through fall. Set out yard waste by 7:00 a.m. Please check directly with your community for yard waste collection start and end dates.

- The communities of Farmington, South Lyon and Wixom have fall bulk leaf collection. Please check directly with your communities for instructions

[← Back](#) Household Hazardous Waste

HOUSEHOLD HAZARDOUS WASTE

 Household hazardous waste (HHW) is products used in and around your home that have one or more of the following characteristics – corrosivity; toxicity; flammability; reactivity. HHW requires special handling and disposal.

➤ Residents are encouraged to bring HHW to a special drop-off event. [Click here for the schedule.](#)

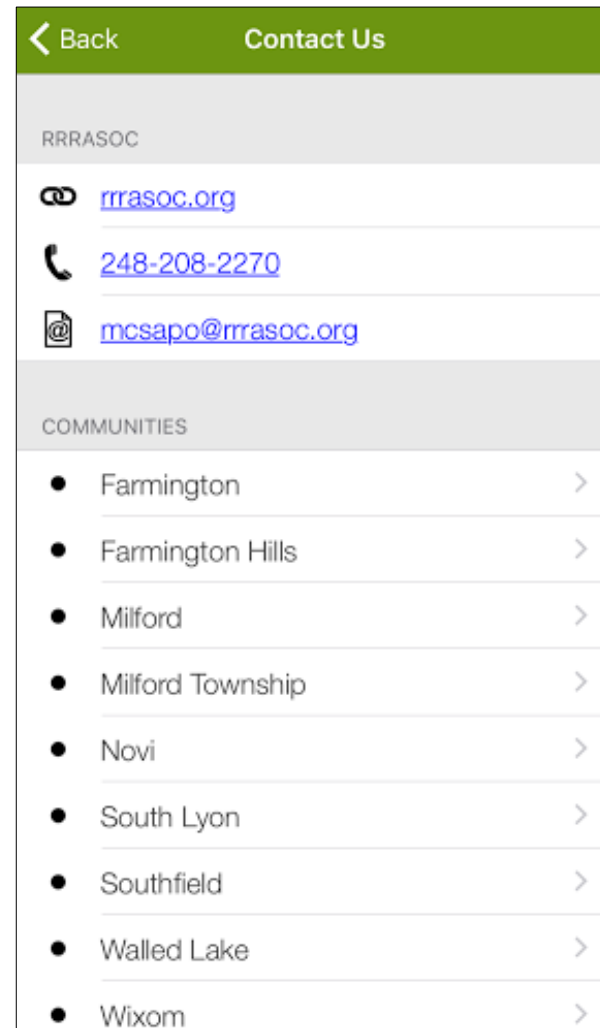

HHW COLLECTION EVENT GUIDELINES

- HHW events are open **only** to residents of RRRASOC's nine member communities.
- Residents may attend any of the events.
- Electronic waste **is** accepted at HHW events (from residents only).

- Paper shredding is available, with a 3 box, 100 lb. limit.
- Items **NOT** ACCEPTED at HHW Events include Latex paint, Commercial waste, Tires, Fire extinguishers, Flares, Ammunition, Smoke detectors.
