marketplace

The Michigan Materials Marketplace is a facilitated program to connect businesses & organizations to drive, develop and scale reuse and recycling market opportunities.

80%

of items buried in landfills could be recycled or reused

75%

of manufacturers report their materials costs have grown

And if you're landfilling material, you're paying twice: once when you bring the material in, and once when you send it out.

42%

materials management accounts for 42% of all US greenhouse gas emissions
