Schupan Recycling would like to submit the following proposal to the MRC policy committee to have it presented to the Board of Directors in February.

As the State of Michigan enters 2018 and plans the future of recycling we must realize the importance of clean and marketable material, the new Chinese policies have made this loud and clear. We must celebrate the successes of the Michigan Bottle Deposit Law as a significant contributor to our 14.9 percent recycling rate. We request the Michigan Recycling Coalition’s Policy Committee endorse and accept or proposed policy.

*The Michigan Recycling Coalition endorses the principle that all used beverage containers should be collected for recycling. The Michigan Recycling Coalition believes that deposit return systems and curb side collection programs complement each other in ways which maximize consumer access and ensure material quality for end-use recycling. The MRC opposes efforts and policy proposals designed to repeal Michigan’s deposit-return law.*

Respectfully submitted,

Roger Cargill
